

ZAKI UL HAQ

Analyst/Data Science/Research

SUMMARY

- Honours BSc in Psychology & Neuroscience at UofT
- Specializes in neurodegenerative research using 3T MRI and deep learning
- Accepted AAIC 2025 abstract on BSO's impact on the nucleus basalis.
- Proficient in MATLAB, Python, R, SPSS, and other languages for neuroimaging and/or data analysis.
- Skilled in communicating complex neuroscience to diverse audiences.

LANGUAGES

English – Fully Proficient

Hindi – Full speaking proficiency

Urdu – Fully proficient

French – A2/B1 Level

EDUCATION

University of Toronto

Sep 1, 2021 – June 13, 2025

Graduated with Distinction (GPA: 3.7/4.0)

Awards: Quinn Family Scholar (\$20,000), Bennett Scholar (\$10,000)

WORK EXPERIENCE

SYNAPSE | University of Toronto Scarborough | Publicity Director and VP

Sep 2024–Present

Led publicity for 65+ neuroscience posts, ensuring scientific accuracy. Trained directors and collaborated on educational event strategies.

Einstein Lab | University of Toronto | Undergraduate Researcher

June 2024–Present

Led BSO-NBM Alzheimer's study using MRI and deep learning. Built brain segmentation pipelines (MATLAB, Python, Linux). Presented findings to the public and collaborated with Dr. N. Calvo and Dr. G. Einstein.

Galea Lab | CAMH | Research Assistant

Jan 2024 – May 2024

Studied APOE effects on hippocampal plasticity (MATLAB, ImageJ).

Used AI tools to analyze cyclicity of female mice. Presented results to CAMH researchers.

Dr. S. Kennedy | Homewood Research Institute | Research Assistant

Sep 2023 – June 2024

Researched youth comorbidities (SUD, depression) for a 100+ page manuscript of literature review. Analyzed treatment outcomes using statistical methods.
